

## NSPAR Statistics 2011

Since the launch of the NSPAR program in February 2005, 1362 NSPAR reviews have been initiated and 998 completed. All program targets are being met.

Following are the detailed statistics (**as of the end of February 2011**) outlining the number of initiated and completed reports within each launched version of NSPAR, as well as the % of reports flagged and forwarded for anonymous review by the Practice Improvement Committee (PIC). The table also provides a breakdown of flagged reports into those flagged for commendation, information and stress as well as those flagged within each version, i.e. family physicians, medical specialists, surgeons and pediatricians.

### Overview 2005 - 2010

	FP	Med Spec	Surgeons	Peds	Total
NSPAR Reviews Initiated	802	269	267	24	1362
NSPAR Reviews Completed	576	201	207	14	998
Flagged Reports Referred to PIC (non-nominally)	111	49	40	4	204
Overall % of Reports Referred to PIC	19.27%	24.38%	19.32%	28.5%	20.97%
Flagged Commendation Reports Referred to PIC	11	12	4	2	29
Flagged Information Reports Referred to PIC	64	19	26	0	109
Flagged Stress Reports Referred to PIC	36	17	10	2	65
Practice Visits					15
