

## **Upcoming Launch of NSPAR with Additional Groups of Physicians in Nova Scotia**

The NSPAR program is beginning to plan for the inclusion of two new groups of physicians in the program. It is expected that the program will be launched early in 2012 with physicians practicing episodic care (for example, those practicing emergency medicine, palliative care, acting as locums and working in walk-in clinics) in Nova Scotia and with psychiatrists. More information will be communicated, most likely in the fall, as it becomes available.
